

7th Workshop on Virtual Reality Interaction and Physical Simulation

Copenhagen, Denmark
11-12 November 2010

The Conference

VRIPHYS is a small international conference, as this is only the 7th conference it is also a relatively young conference. The audience is mostly young researchers from European countries such as Denmark, Germany, France and neighbouring countries. The scientific papers presented here are of good quality, and are subject to a double-blinded peer-review system. The reviewers are some of the best in the field. The topic of the conference is highly specialized, making VRIPHYS a small but focused conference.

Sponsorship

Industry sponsor participation plays an important role in bringing key research to the international academic community. It helps keep conference fees accessible to all members, especially students. It is an opportunity for industry to connect with the brightest new & future graduates that will be attending and presenting at this conference.
